Strategy to Results. CAMELOT Management Consultants is the globally leading consulting specialist for value chain management in the process, consumer product goods and manufacturing industries. As a specialist we stand for leading-edge expertise, innovative concepts and solutions as well as for superior project quality and results.

Visiting Consultant Chemicals (f/m/d)

What's your impact?

- ▶ As a management consultant, you analyze the challenges chemical companies face and develop solutions together with your colleagues – whether it's new supply chains for products, the location of recycling activities at chemical sites, or the tracking of food additives on their way to the consumer.
- ▶ Still on the fence about whether consulting can be your future career? As a Visiting Consultant, you have the opportunity to get a taste of consulting for a few months – if possible, directly on projects at the client's site. You will be a full member of our project team from the very beginning. Experienced consultants will support you during your induction and pass on their knowledge so that you can gradually take on responsibility for project modules. If you are enthusiastic about the job as a consultant, there is the possibility of a permanent position after the temporary assignment.

Location: Cologne

What do we believe in? Triggering innovation by collaboration – this is our mission. Consultancy is people business and knowledge is key. That is why we value our employees as much as our clients. Together, we develop skills mutually matching our visions and ideas by constantly learning, growing and innovating. CAMELOT colleagues take responsibility from the moment they join us. Entrepreneurial attitude is as important to us as strong teamwork, knowledge sharing and corporate social responsibility.

What makes you the perfect fit?

- ▶ The subject you have studied is not decisive – we employ economists and natural scientists as well as graduates from other disciplines. You should have very good analytical and communication skills, an open mind for new things, and enjoy challenges.
